

Pay at Table

Unlock faster, smarter, and seamless payments for your guests.

What is Pay at Table?

With wi-Q's Pay at Table solution, guests can settle their bill quickly and securely, right from their phone, without waiting for staff or splitting the bill awkwardly. Whether you're running a hotel bar, casual restaurant, or QSR, our solution gives guests the freedom to pay how and when they want.

Instantly retrieve their bill from your POS.

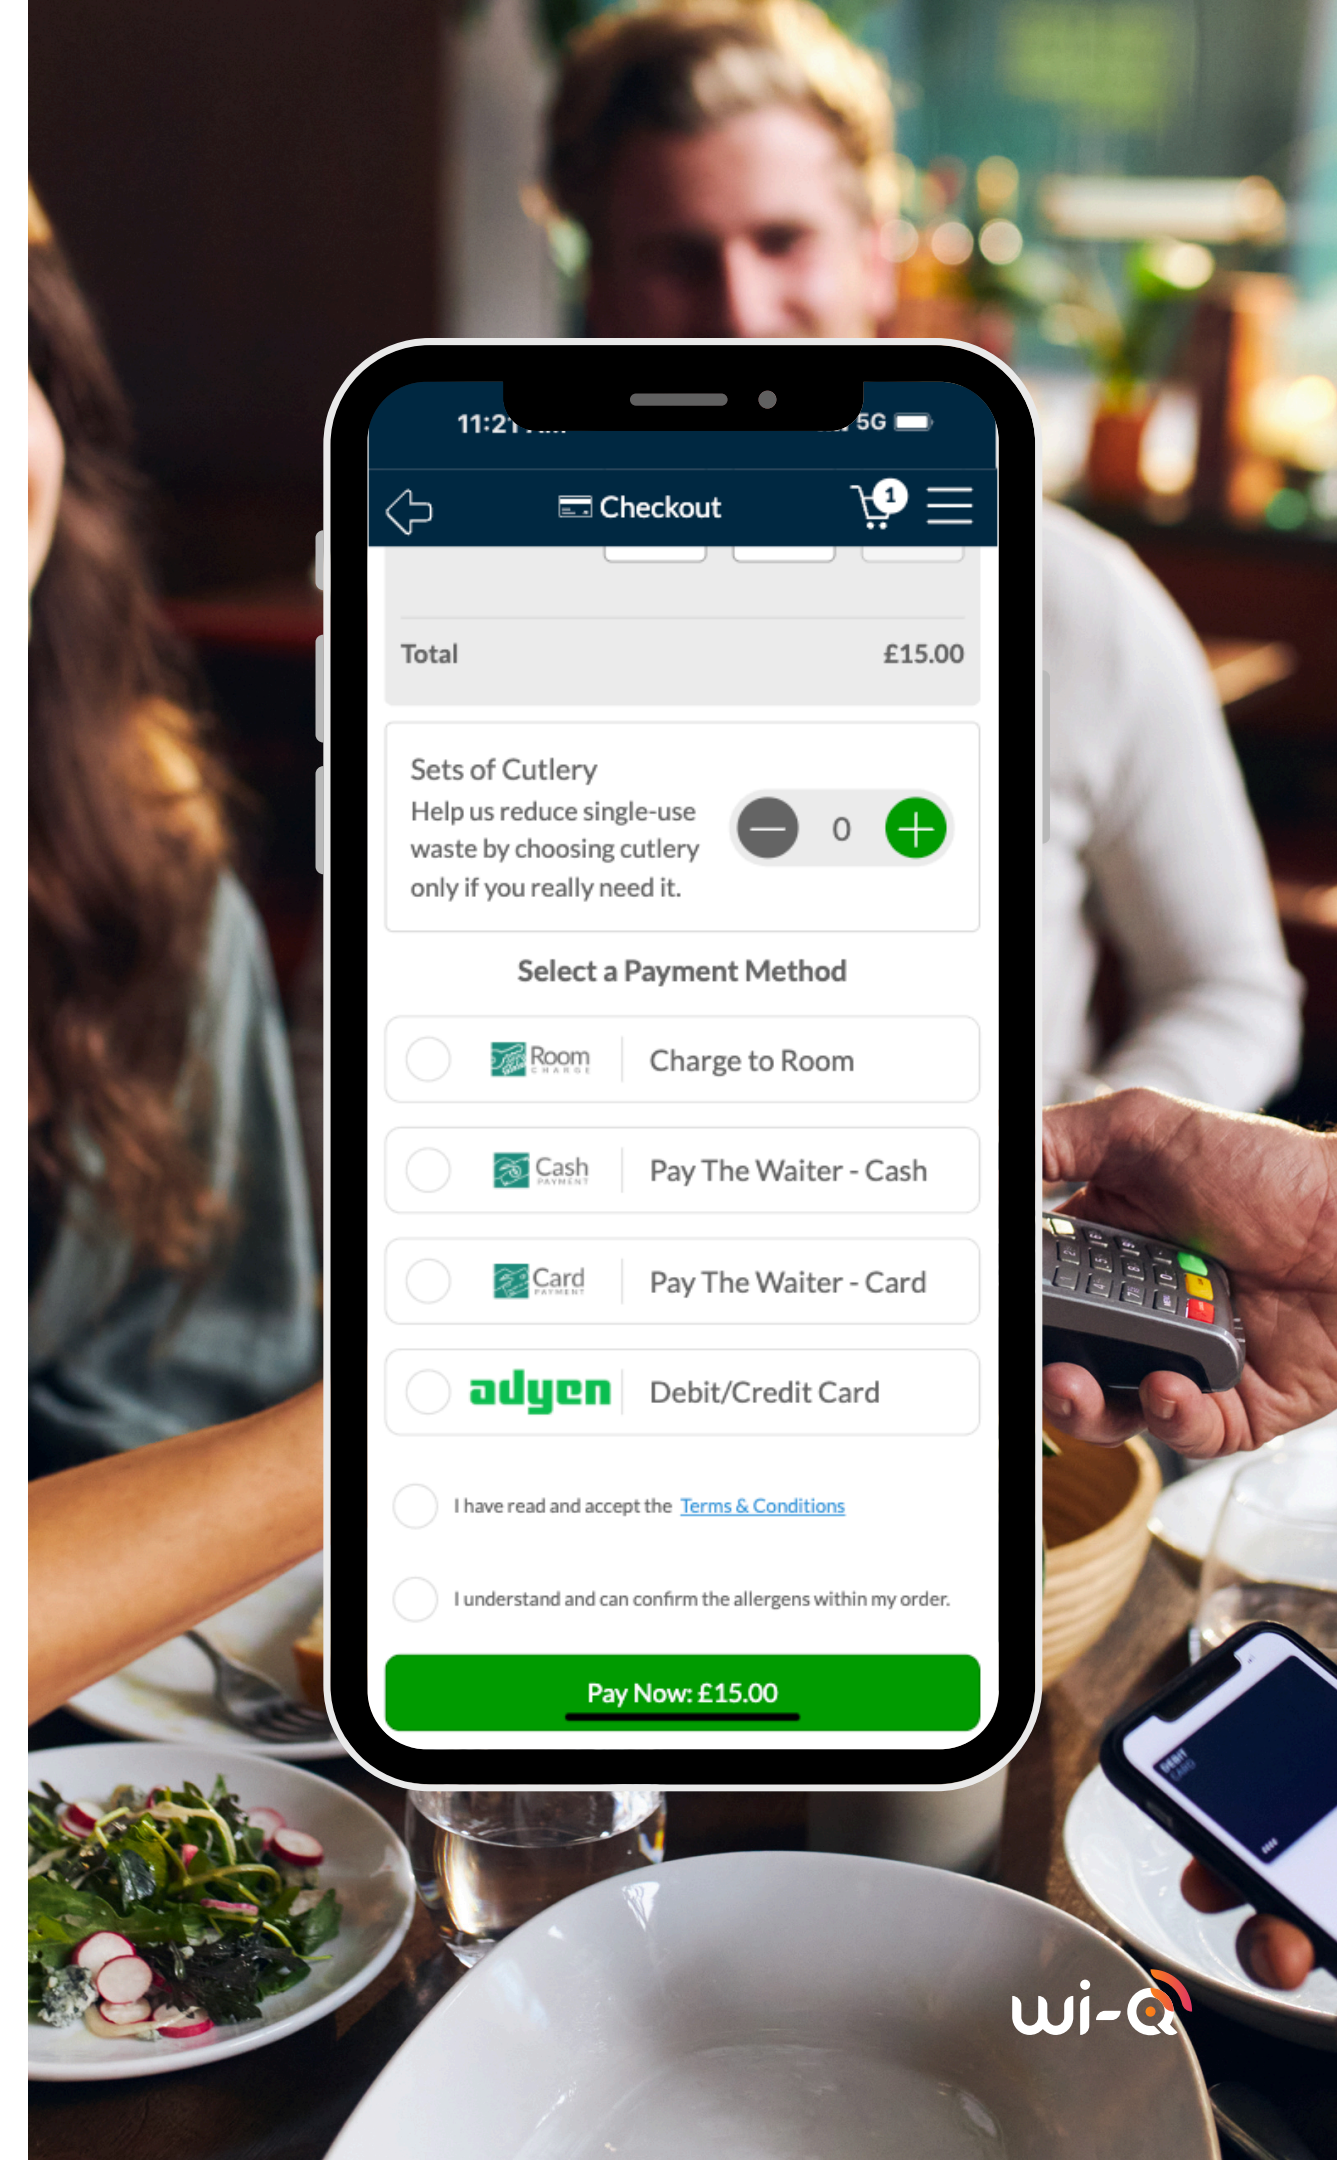

View a live, itemised version of the check.

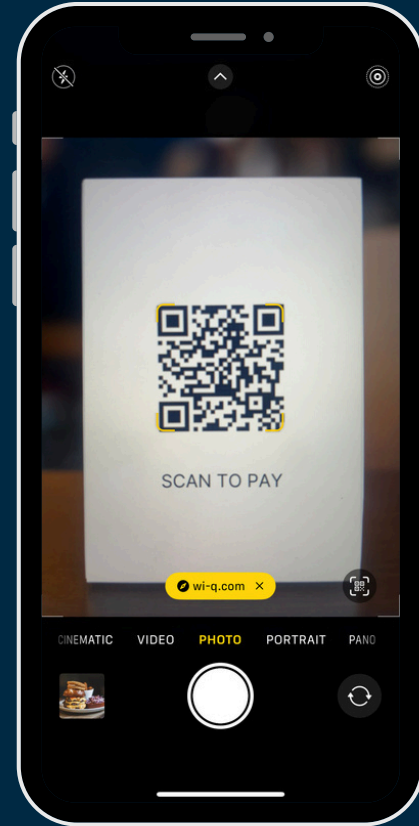

Pay in full or split the total with others at the table.

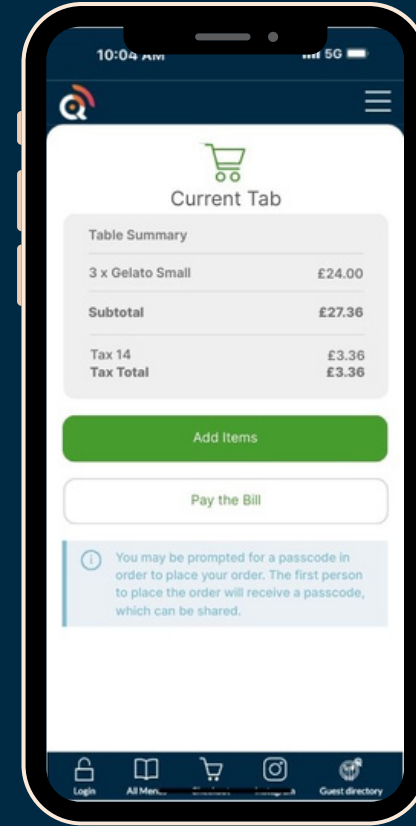

Add gratuities, opt in to marketing, and request an email receipt.

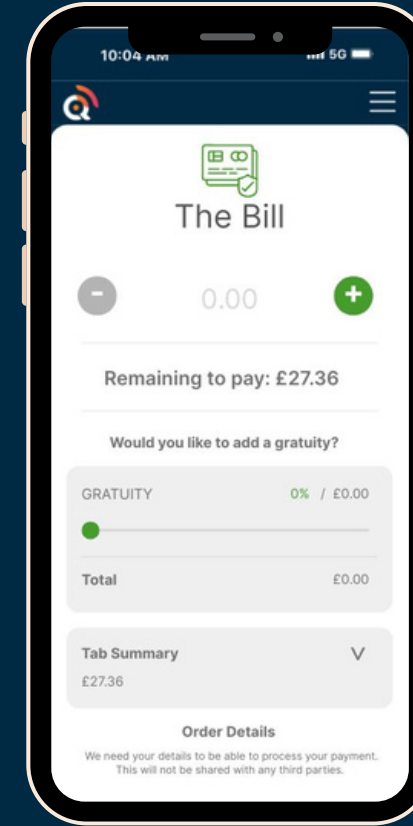

01 / Scan

A guest scans the QR code specifically allocated to that particular table/seat/room/sunbed number.

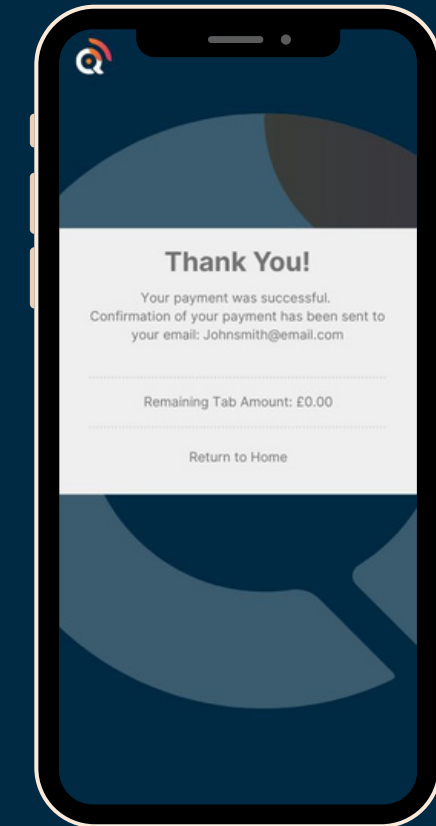

02 / Your Tab

The guest will see a breakdown of their bill and can either pay part of the bill or the full bill.

03 / Pay

The guest will enter the amount they wish to pay and add gratuities if desired - the POS will be updated accordingly as payments are made until the balance is zero where the check will close.

04 / Confirmation

Once each payment has been made, a confirmation with the remaining balance will display on the screen.

Key Benefits

Faster Payments

01

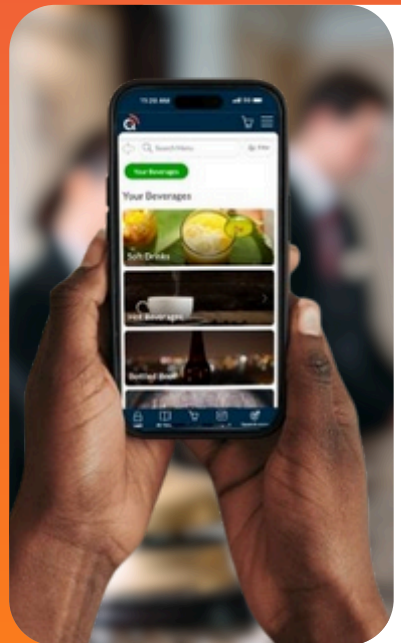

Guests can easily pay their way, using their preferred payment method, and even add gratuities should they wish to.

Split the Bill

03

Our Pay at Table solution has an intuitive Split the Bill feature, without the need for awkward calculations.

Hassle-Free

02

Pay at Table is fully connected to your POS and payments provider allowing for a seamless service for your guests, and staff.

Reduced Staff Pressure

04

With payments under the guests control, your staff can focus on what really matters, delivering an excellent service.

Our Integration Partners

Integrating digital ordering with your systems is essential in today's fast-paced hospitality landscape, ensuring efficiency and accuracy across every operational area, from POS to Payment to PMS and beyond...

Explore Our Mobile Ordering Solutions

In 2014, wi-Q became one of the first web-based mobile ordering solutions to give customers instant access to hospitality venues' menu of services; with ordering and payment capability, via their own internet-enabled device.

In the past 10 years, our global clients have benefited from the expertise of our award-winning development team, who have continued to challenge the boundaries of what can be achieved through the mobile ordering platform - alongside world-leading industry partners.

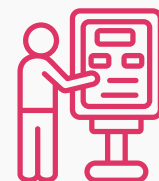

Our solutions:

INTEGRATED MOBILE ORDERING

Scan

Multi-award winning, fully customisable mobile ordering designed to integrate with your existing tech stack.

SELF-SERVICE KIOSKS

Kiosk

Our efficient self-service kiosks designed to support high order frequencies and reduce staffing costs.

ORDER MANAGEMENT

Connect

Manage and process orders from one intuitive interface, integrated with leading platforms across the globe.

INTEGRATED CRM

Loyalty

We integrate with leading loyalty platforms such as Como and Aura to improve customer retention.

INTEGRATED DELIVERY

Last Mile

Last Mile integrates with all your delivery services, allowing your customers to have their food orders delivered directly to their door.

Here to drive your revenue
